04/2016 - 03/2017

91.2

PROJECTS

Blog CRUD App [🔗](#)

- I developed the 'Blog CRUD App,' a full-stack web application that lets users sign up, log in, and carry out CRUD operations on blog articles. Authentication and MongoDB are combined for secure data storage.

Chat App [🔗](#)

- Using chatengine.io, I developed an engaging chat application. This feature-rich program has the ability to establish many rooms, online statuses, a stylish appearance, read receipt icons, image support, and sound notifications.

PizzaCrust - Pizza Ordering App [🔗](#)

- Using the MERN stack, I was able to create a user-friendly pizza ordering app. Users can quickly sign up, log in, browse a selection of pizzas, put them to the cart, and then pay securely over the Stripe payment gateway while checking out using the app.

INTERNSHIP

Web Developer Intern

InstaRemedy

05/2023 - 05/2023

InstaRemedy is an E-commerce platform dedicated to enhancing lives by providing holistic post-purchase issue resolution and consumer guidance services.

Achievements/Tasks

- Designed and constructed the Instaremedy website, ensuring a dynamic and engaging user experience.
- Collaborated on a MERN project aimed at developing an effective import management system.
